Area Potter

## *User Documentation*

How to use Area Potter website ?
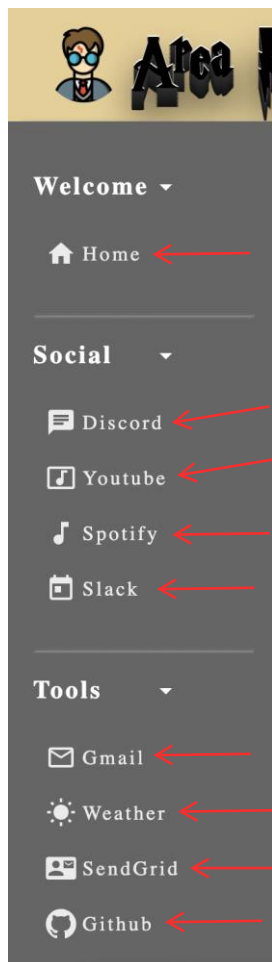

1) Login / Register

You will need to login or to register.

You can also login into the website using Google Authentification.

2) Navigate

Once you're logged in, you can navigate in the website with the sidebar.

 You can see the list of the Services on the left which is sorted in two groups : Social services and Tools services.
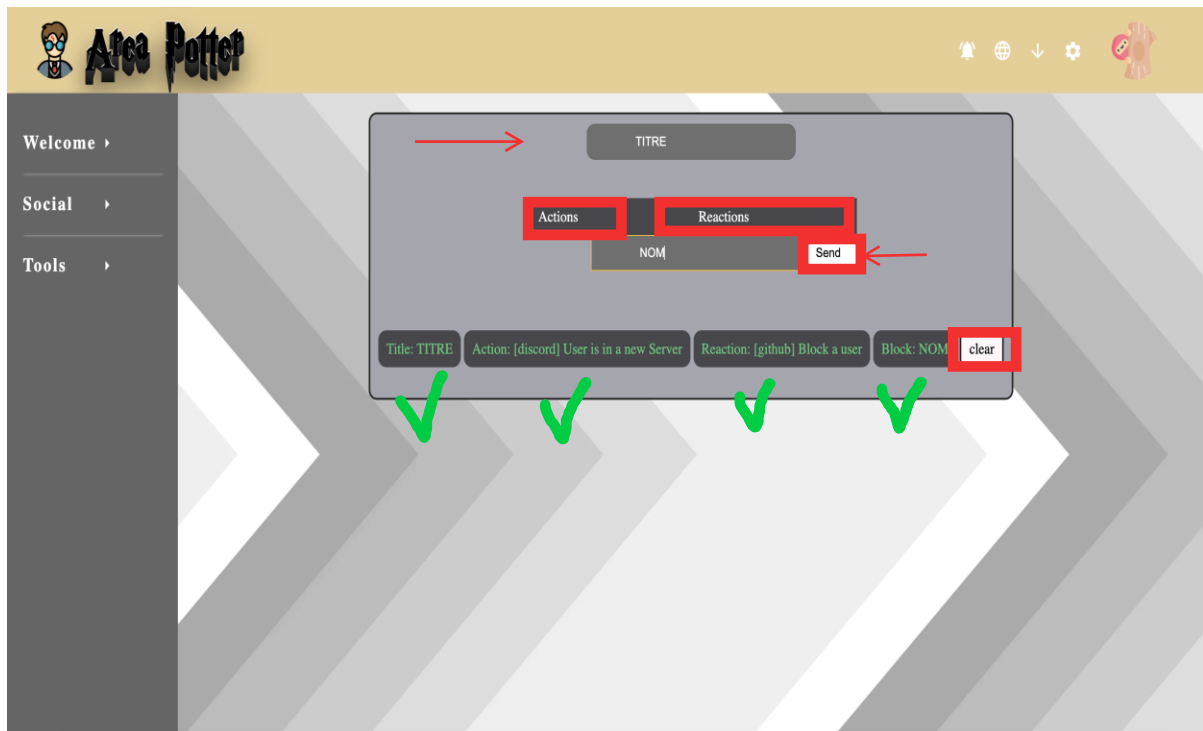

3) Connect to Service

To use the differents Services widgets, you will need to connect to them.

To do that you will click on the service of your choice in the list. And then click on the Login button. It will redirect you to a securised authentification.

4) Configurate your AREA

Once you are connected to your service you will be redirected on the AREA creation panel.

You will see few options displayed on your screen.
To create a valid Area you must :

- Fill the title form of your Area.
- Chose your action (and provide a parameter if needed).
- Chose your reaction and provide a parameter adapted to the theme of the reaction.

You also can clear all the options if you want to comeback on what you put on your AREA.

When everything is done and valid, options will turn green and you can click on send.

Right now your AREA is created !
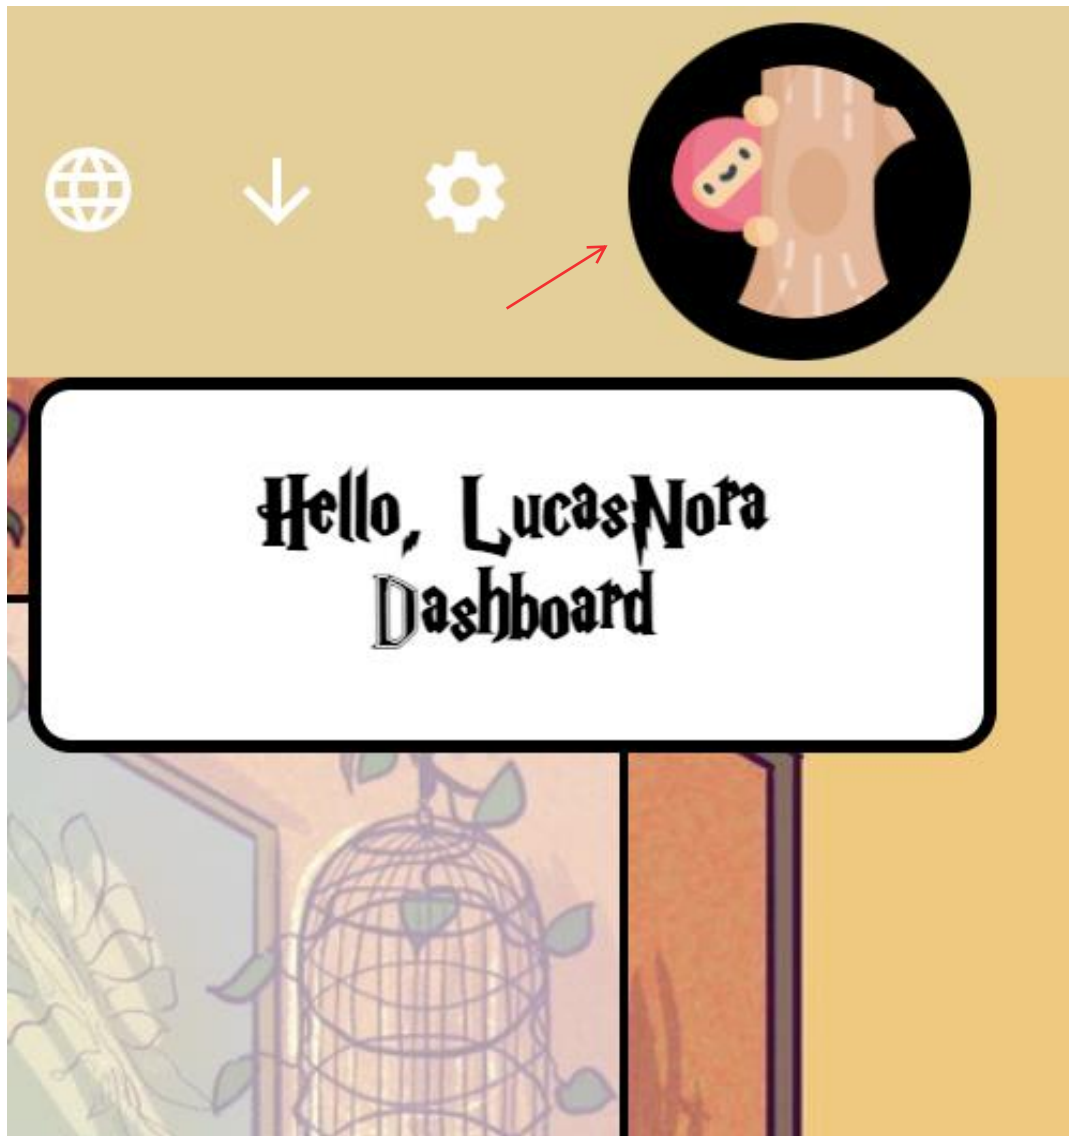

5) Manage your Area

Once you have created your area you may to the Home page.

There you can see all your Areas, their name and all the informations about.

You can also delete them by clicking on the Delete button.

6) Customisation and User options

By clicking the avatar on the sidebar, you will be able to see the User you are connected with.

By clicking on the options button you will see two possibilities :

- The Logout button to disconnected from you current account
- The House button.

Once you clicked on the house button you will be able to change your Home background chosing your theme.

Then it will appear on your Home.

7) Download APK version of Area Potter

By clicking on the dowload section present on the topbar you'll find a Download APK button.

It will download the APK file for the Area Potter's mobile app.
